

### Description:

Works three ways: (1) A blend of odor neutralizing chemicals eliminates odors through a chemical process. Instead of masking or covering up bad odors, VANILLAS IN THE MIST traps odors and locks them into an odorless form. (2) Bacteria digest the waste and organic matter that cause the odors. (3) The strong vanilla fragrance helps mask odors while the neutralizing agents and Bacteria take effect.

### Benefits:

- ★ Destroys odors caused by organic waste and decomposition
- ★ Reduces waste surcharges by lowering COD, BOD, and TSS levels
- ★ Provides flocculant properties
- ★ Contains no dangerous caustics, acids, bleaches, or oxidizers
- ★ Safe in all drainage systems, lagoons, and water treatment areas

### EFFECTIVE AGAINST:

- |                       |                           |                           |
|-----------------------|---------------------------|---------------------------|
| • <i>Urine</i>        | • <i>Pet Odors</i>        | • <i>Cigarette Smoke</i>  |
| • <i>Smelly Acids</i> | • <i>Hydrogen Sulfide</i> | • <i>Smoke Damage</i>     |
| • <i>Amines</i>       | • <i>Ammonia</i>          | • <i>Many other types</i> |
| • <i>Mercaptans</i>   | • <i>Animal Waste</i>     | • <i>of organic odors</i> |
| • <i>Thioethers</i>   | • <i>Food Waste</i>       |                           |

### Application:

**For drainage systems:** Drip or feed 2-4 ounces of product per day depending on volume of water in system. A shock treatment may be required for initial treatment.

**For treatment ponds:** Mist over the entire surface for initial treatment and maintain by adding 1/2 gallon per acre foot over weekly intervals.

**For dumpsters and trash cans:** Dilute with water as much as 1:50 if desired. Spray the area with a fine mist and repeat when odor returns.

**For restrooms:** Dilute with water as much as 1:50 if desired. Spray around toilets, urinals, and floors.

**For water treatment operations and belt presses:** Use one part VANILLAS IN THE MIST to 50,000 - 100,000 parts of raw influent.

**For space spraying or fogging:** Dilute VANILLAS IN THE MIST 1-2 ounces per gallon and apply manually with a trigger sprayer or automatically with the 1952-B Atomist Space Sprayer.

### Specifications:

Optimal pH range	5.0 - 9.0 for best performance
Optimal Temperature Range	40 - 110°F for best performance
Density @ 25°C (ASTM-D-287)	8.34 lb./gal. (1.0 g/mL)
Color	Blue
Appearance	Clear
Fragrance	Vanilla odor
Health/Flammability/Reactivity	0/0/0
Personal Protection	A - safety glasses
