

BioGard MK II Dry Misting technology

Portable decontamination solutions - in minutes!

The BioGard DMS 2001 is a lightweight, portable unit capable of decontaminating areas of up to 60 metres cubed in just 12 minutes! Perfect treatment rooms, waiting rooms, meeting rooms and more.

- **Complete decontamination of areas up to 60m³ in 12 minutes**
- **Broad Spectrum biocide achieves a kill rate of 99.9999% (log 6 reduction)^o**
- **Simple, safe and effective – harmless to people, plants & animals**
- **No dwell time after decontamination. Use the room immediately**
- **Directional misting head for targeted treatment**
- **Digital timer ensures measured 'cut off'. Start and walk away!**
- **Controlled by simple on/off switch**
- **12v, 24v, 110v or 240v options**
- **Produces a fine 'dry mist' that gets into difficult to reach areas**
- **5 micron mist 'floats' in the air longer to kill airborne pathogens**
- **Kills pathogens on contact with air and surfaces in under 30 seconds***
- **Does not damage sensitive equipment – no need to remove**
