

DERMAGARD

HAND SANITISER

Based on the same formulation as our TriBioSan, this water based alcohol free hand sanitizer will not sting or irritate cracked or broken skin. Because it is alcohol free and pH neutral, it does not lead to drying or cracking of skin. Indeed, it has been shown to aid the improvement of psoriasis, eczema, scabies, acne and other bacterial skin conditions.

Unlike most alcohol based hand sanitizers, DermaGard is a broad spectrum hand sanitizer, which means it is effective against all pathogen types including bacteria, mycobacteria, viruses, spores, yeasts, moulds and fungi.

PRODUCT DETAILS

Skin pH neutral

Contains no alcohol

Contains no bleach
